Viking Enterprise Solutions Announces Award-Winning Edge AI Turnkey Appliance

SAN JOSE, California June 17, 2025 /PRNewswire/ — Viking Enterprise Solutions, a product division of Sanmina Corporation (NASDAQ: SANM), today announced Viking Edge AI, an Edge AI Computational Storage Appliance that eliminates the constraints of traditional edge computing deployment.

Traditional edge architecture relies on constant data movement between the edge and the cloud because of limitations on storage, compute power and network access at the edge. This reduces efficiency due to challenges with latency, security, bandwidth and real time response. Viking Edge AI combines powerful compute, storage and network in one edge appliance allowing users to rapidly deploy their algorithms.

Viking Edge AI combines AMD CPUs, NVIDIA accelerated computing, and NVIDIA DPUs with Cloud Native Kubernetes AI framework. The system provides real-time AI inferencing and modeling within a software infrastructure enabling data scientists and machine learning architects to deploy NVIDIA AI Enterprise, NVIDIA NIM microservices and customers' own microservices. Viking Edge AI supports use cases like smart factory (visual inspection), automation, media & entertainment, transportation & logistics, healthcare and video monitoring.

"Viking's Edge AI addresses the existing architecture challenges with a turnkey solution enabling customers to quickly deploy their applications without the need for additional infrastructure. This system supports virtualized GPUs as well as a wide range of NVIDIA GPUs to provide flexibility in meeting the demands of different edge AI use cases," said Rick Kumar, SVP of Viking Enterprise Solutions.

Viking Edge AI was awarded "Best of Show" at FMS 2024: the Future of Memory and Storage.

About Viking Enterprise Solutions

Viking Enterprise Solutions, a division of Sanmina Corporation, provides advanced data center products including solid-state memory and disk-based storage server appliances, JBOD storage systems and other products for a variety of data center and storage applications. Viking Enterprise Solutions award winning products are tailored for integration into OEM, system integrator and data center products, reducing development and operating costs while improving time-to-market. More information is available at www.vikingenterprisesolutions.com.

About Sanmina Corporation

Sanmina Corporation (NASDAQ: SANM) is a Fortune 500 company and a leading integrated manufacturing solutions provider serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina provides end-to-end manufacturing solutions, delivering superior quality and support to Original Equipment Manufacturers (OEMs) primarily in the industrial, medical, defense and aerospace, automotive, communications networks, and cloud infrastructure markets. Sanmina has facilities strategically located in key regions throughout the world. More information about the company is available at www.sanmina.com.

Sanmina Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales principal customers, the ability of Sanmina to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in our Company's Annual and quarterly reports filed with the Securities Exchange Commission.
