Nokia first to announce manufacturing of broadband network electronics products for BEAD program in U.S.

Pleasant Prairie, Kenosha County, Wisconsin – Today Nokia has become the first telecom company to announce the manufacturing of fiber-optic broadband network electronics products and optical modules in the U.S. for use in the Broadband Equity, Access and Deployment (BEAD) program. Nokia partners with Sanmina Corporation to manufacture products in the U.S. at the Sanmina Pleasant Prairie facility in Kenosha County, Wisconsin.
